Contents of Volume 24

Number 1, July 1969

HILGARTNER, C. A. and RANDOLPH, J. F., Psycho-logics. 3. The Structure of Empathy	1
SHEA, S. M., KARNOVSKY, M. J. and BOSSERT, W. H., Vesicular Transport across Endothelium: Simulation of a Diffusion Model	30
EBERHARDT, L. L., Similarity, Allometry and Food Chains	43
HULETT, H. R., Limitations on Prebiological Synthesis	56
PARRY, D. A. D., An Alternative to the Coiled-coil for α -Fibrous Proteins	73
LEVINE, M. and LEVINE, S., Kinetics of Induced Uphill Transport of Sugars in Human Erythrocytes	85
FRIED, J., Correction for Threshold Error in the Determination of Generation Times by the Grain-count Halving Method	108
LETTERS TO THE EDITOR	
OZONOFF, D., An Attack on "A Defense of Vitalism"	121
VAN DER STEEN, W. J., A Comment on Vitalistic Principles	123
COHEN, D., A Necessary Mechanism for the Intracellular Degradation of Metabolically Active Macromolecules	126
FANG, P. H., Analysis of Tuberculin Receptor Site on Sensitized Human Lymphocytes	128

Number 2, August 1969

SHIKATA, M., Transformation of Mictic Index through a Diploid Individual	131
CHERRY, R. J. and CHAPMAN, D., Optical Determination of the Thickness of Thin Lipid Films	137
KORN, R. W., A Stochastic Approach to the Development of <i>Coleocheate</i>	147
SEGAL, J. R., The "Independence Principle" of Biological Membranes: Its Misuse	159

SIEGEL, I., Theoretical Aspects of Termination of Immune Tolerance by Cross-reacting Antigens	171
BARTLEY, W., DEAN, B. and FERDINAND, W., Maintenance of Mitochondrial Volume and the Effects of Phosphate and ATP in Producing Swelling and Shrinking	192
STRAILE, W. E., Vertical Cutaneous Organization	203
ALMÉN, T., Contrast Agent Design. Some Aspects on the Synthesis of Water Soluble Contrast Agents of Low Osmolality.	216
SWADE, R. H., Circadian Rhythms in Fluctuating Light Cycles: Toward a New Model of Entrainment	227

LETTER TO THE EDITOR

WILLIAMS, R. B., A Table of Mean Effective Temperatures for the Metabolism of Biological Systems Subjected to Sinusoidal Cycles in Temperature	240
--	-----

Number 3, September 1969

LOVRIEN, R., Activation Diagrams in Enzyme Catalysis	247
AKRIGG, A., AYAD, S. R. and BLAMIRE, J., Uptake of DNA by Competent Bacteria—A Possible Mechanism	266
PHILLIPS, A. P., Unwinding Models for Double-helical DNA during its Replication and Transcription	273
SHIKATA, M., Transformation of Mictic Indices in Components of Pedigree	279
KATSUMA, M., Influence of Enzyme Activators and Inhibitors, Present in an Enzyme Preparation, on the Relations between Reaction Rate and Enzyme Concentration	294
LAURIA, F. E., Mathematical Approach to the Study of a Cerebral Cortex. III. The Columnar Organization in the Cortex and the Spread of Activity in the Model	307
HOGG, J., WILLIAMS, E. J. and JOHNSTON, R. J., The Membrane Electrical Parameters of <i>Nitella translucens</i>	317
HANSCH, P. E., A Theoretical Basis for the Entrainment of Chemostat Populations	335

Index to Volume 24

- Activation diagrams in enzyme catalysis, 247
- AKRIGG, A., AYAD, S. R. & BLAMIRE, J., Uptake of DNA by competent bacteria—a possible mechanism, 266
- Allometry, similarity and food chains, 43
- ALMÉN, T., Contrast agent design. Some aspects on the synthesis of water soluble contrast agents of low osmolality, 216
- Alternative to the coiled-coil for α -fibrous proteins, 73
- Analysis of tuberculin receptor site on sensitized human lymphocytes (letter), 128
- Antigens, cross-reacting, theoretical aspects of, termination of immune tolerance by, 171
- Attack on "A defense of vitalism" (letter), 121
- AYAD, S. R. (see AKRIGG, A.), 266
- Bacteria, competent, uptake of DNA by—a possible mechanism, 266
- BARTLEY, W., DEAN, B. & FERDINAND, W., Maintenance of mitochondrial volume and the effects of phosphate and ATP in producing swelling and shrinking, 192
- BLAMIRE, J. (see AKRIGG, A.), 266
- BOSSERT, W. H. (see SHEA, S. M.), 30
- Catalysis, enzyme, activation diagrams in, 247
- Cerebral cortex, mathematical approach to the study of. III. The columnar organisation in the cortex and the spread of activity in the model, 307
- CHAPMAN, D. (see CHERRY, R. J.), 137
- Chemostat populations, a theoretical basis for the entrainment of, 335
- CHERRY, R. J. & CHAPMAN, D., Optical determination of the thickness of thin lipid films, 137
- Circadian rhythms in fluctuating light cycles: toward a new model of entrainment, 227
- COHEN, D., A necessary mechanism for the intracellular degradation of metabolically active macromolecules (letter), 126
- Comment on vitalistic principles (letter), 123
- Contrast agent design. Some aspects on the synthesis of water soluble contrast agents of low osmolality, 216
- Correction for threshold error in the determination of generation times by the grain-count halving method, 108
- Cortex, cerebral, mathematical approach to the study of. III. The columnar organisation in the cortex and the spread of activity in the model, 307
- Cycles, circadian rhythms in fluctuating light: toward a new model of entrainment, 227
- Cycles in temperature, sinusoidal, table of mean effective temperatures for the metabolism of biological systems subjected to, 240
- DEAN, B. (see BARTLEY, W.), 192
- Development of *Coleocheate*, a stochastic approach to, 147
- Diffusion model, simulation of: vesicular transport across endothelium, 30

- DNA, double-helical, unwinding models for, during its replication and transcription, 273
- DNA, uptake of by competent bacteria—a possible mechanism, 266
- EBERHARDT, L. L., Similarity, allometry and food chains, 43
- Electrical parameters of *Nitella translucens*, membrane, 317
- Endothelium, vesicular transport across: simulation of a diffusion model, 30
- Enzyme activators and inhibitors, present in an enzyme preparation, influence on the relations between reaction rate and enzyme concentration, 294
- Enzyme catalysis, activation diagrams in, 247
- Erythrocytes, human, kinetics of induced uphill transport of sugars in, 85
- FANG, P. H., Analysis of tuberculin receptor site on sensitized human lymphocytes (letter), 128
- FERDINAND, W. (see BARTLEY, W.), 192
- Food chains, allometry and similarity, 43
- FRIED, J., Correction for threshold error in the determination of generation times by the grain-count halving method, 108
- Generation times, determination of, by the grain-count halving method, correction for threshold error in, 108
- HANSCH, P. E., A theoretical basis for the entrainment of chemostat populations, 335
- HILGARTNER, C. A. & RANDOLPH, J. F. Psychologies III. The structure of empathy, 1
- HOGG, J., WILLIAMS, E. J. & JOHNSON, R. J., The membrane electrical parameters of *Nitella translucens*, 317
- HULETT, H. R., Limitations on prebiological synthesis, 56
- Immune tolerance, theoretical aspects of termination of, by cross-reacting antigens, 171
- "Independence principle" of biological membranes: its misuse, 159
- Influence of enzyme activators and inhibitors, present in an enzyme preparation, on the relations between reaction rate and enzyme concentration, 294
- Intracellular degradation of metabolically active macromolecules, a necessary mechanism for (letter), 126
- JOHNSTON, R. J. (see HOGG, J.), 317
- KARNOVSKY, M. J. (see SHEA, S. M.), 30
- KATSUMA, M., Influence of enzyme activators and inhibitors present in an enzyme preparation, on the relations between reaction rate and enzyme concentration, 294
- Kinetics of induced uphill transport of sugars in human erythrocytes, 85
- KORN, R. W., A stochastic approach to the development of *Coleochaete*, 147

- LAURIA, F. E., Mathematical approach to the study of a cerebral cortex. III. The columnar organization in the cortex and the spread of activity in the model, 307
- LEVINE, M. & LEVINE, S., Kinetics of induced uphill transport of sugars in human erythrocytes, 85
- LEVINE, S. (see LEVINE, M.), 85
- Limitations on prebiological synthesis, 56
- Lipid films, thin, optical determination of the thickness, 137
- LOVRIEN, R., Activation diagrams in enzyme catalysis, 247
- Lymphocytes, sensitized human, analysis of tuberculin receptor site on (letter), 128
- Macromolecules, metabolically active, a necessary mechanism for the intracellular degradation of (letter), 126
- Maintenance of mitochondrial volume and the effects of phosphate and ATP in producing swelling and shrinking, 192
- Mathematical approach to the study of a cerebral cortex. III. The columnar organization in the cortex and the spread of activity in the model, 307
- Mechanism for the intracellular degradation of metabolically active macromolecules (letter), 126
- Membrane electrical parameters of *Nitella translucens*, 317
- Membranes, biological, the "independence principle" of: its misuse, 159
- Mictic index, transformation of, through a diploid individual, 131
- Mictic indices, transformation of, in components of pedigree, 279
- Mitochondrial volume, maintenance of, and the effects of phosphate and ATP in producing swelling and shrinkage, 192
- Model, diffusion, simulation of: vesicular transport across endothelium, 30
- Model of entrainment; circadian rhythms in fluctuating light cycles, 227
- Models, for unwinding of double-helical DNA during its replication and transcription, 273
- Necessary mechanism for the intracellular degradation of metabolically active macromolecules (letter), 126
- Optical determination of the thickness of thin lipid films, 137
- Organization, vertical cutaneous, 203
- OZONOFF, D., An attack on "A Defense of Vitalism" (letter), 121
- PARRY, D. A. D., An alternative to the coiled-coil for α -fibrous proteins, 73
- PHILLIPS, A. P., Unwinding models for double-helical DNA during its replication and transcription, 273
- Phosphate and ATP, effects of, in producing swelling and shrinkage: maintenance of mitochondrial volume, 192
- Populations, chemostat, a theoretical basis for the entrainment of, 335
- Proteins, α -fibrous, alternative to the coiled-coil for, 73
- Psycho-logics III. Structure of empathy, 1
- RANDOLPH, J. F. (see HILGARTNER, C. A.), 1
- Receptor site, tuberculin, analysis of, on sensitized human lymphocytes (letter), 128
- Replication and transcription, unwinding models for double helical DNA, 273

- SEGAL, J. R., The "independence principle" of biological membranes: its misuse, 159
- SHEA, S. M., KARNOVSKY, M. J. & BOSSERT, W. H., Vesicular transport across endothelium: simulation of a diffusion model, 30
